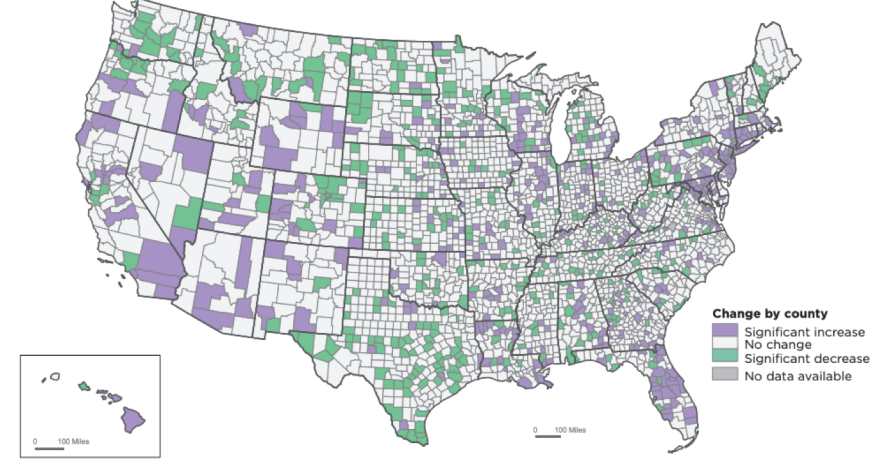

Figure 1.
Change in Percentage of People in Poverty From 2005-2009
to 2010-2014

Notes: A significant change is statistically different from zero at the 90 percent confidence level. Due to the county boundary changes that occurred within the 2005-2009 and 2010-2014 time periods, the following county equivalents appear in the "No data available" category: Petersburg, Alaska; Prince of Wales-Hyder, Alaska; Hoonah-Angoon, Alaska; Bedford, Virginia; and Bedford City, Virginia. For more information, see <www.census.gov/acs>. Source: U.S. Census Bureau, 2005-2009 and 2010-2014 American Community Surveys, 5-Year Estimates.

What the census official report tells us:

From 2005–2009 to 2015–2019, a period that spanned both the Great Recession and the subsequent economic expansion, the poverty rate increased in 429 counties and decreased in 409 counties.

what I want to
find out

&

what the
government is
interested in

From the data's point of view:

- ❖ What other factors besides the economic recession and expansion are causing the poverty rate changes?
- ❖ What actions/programs the government can take to lower the poverty rate, e.g.
 - Adjusting state tax rate?
 - Making new laws?
 - Providing incentives for better education/training?

Plan

To look at the following aspects for each state during the three time period (2005-2009, 2010-2014, 2015-2019):

1. State tax rate changes
2. New state laws being passed
3. Education level changes

Tools: Python (pandas, numpy, scipy, matplotlib, scikit-learn)
